Behavioral Health Resources

RESTORE LIFE, BALANCE AND WELL-BEING

Rediscover your health and well-being. Make positive changes that will last.

Our goal is to provide resources and help you improve your overall health and well-being in order to live a happier and healthier life.

Your emotional well-being is an important part of your overall health. Stress, depression, and anxiety can contribute to a variety of physical ailments including complications of chronic illnesses, digestive disorders, sleep disturbances, obesity, substance abuse and lack of energy.

Emotional and Mental Health issues can be brought on by everyday life situations including the loss of a loved one, juggling responsibilities, school concerns, or taking care of a child or older family member.

Positive emotions have been linked with better health, longer life, and greater well-being. You are very important to us and there is help available. Olathe Health has partnered with many community groups to provide you a list of resources to help with all of your health needs.

Transforming Lives in our Community (TLC) has partnered with Olathe Health to provide access (in-office and home), affordable (including non-insured), and quality mental and behavioral health services for children, adolescents, and families. If you're experiencing anxiety, autism, ADD/ADHD, problems at school, relationship issues, loss of a loved one, anger outbursts, history of abuse or neglect, depression, mood swings, feeling hopeless/helpless, history of trauma, or any other mental or behavioral health needs then help is available.
